Program Digital India.

Organization aims to impart basic computer literacy to the students of Rural areas enable them pursuing higher education and improve their future employability. Another important project aspect is promoting importance of spoken English. English is a language of aspiration and opportunity in India. However, it is observed that most government teachers themselves have come from a 'system' where English was a 'subject' that lacked any real connect with the learner's life and was taught mostly through rote processes. Many children in rural areas are not getting trained in English speaking as there are no proper schools. Even when there are schools, there is no proper management. Spoken English skills for children in rural areas is necessary as it would be helpful in building their confidence and their future. Teaching in rural areas should be done in a creative way which involves less strain and educates more number of children in a short period of time.

Organization distributes food ,Sweet to the needy and Poor and gives happiness to every poor and old people, distribute dry food and sweets on festivals like Deepawali etc. Every year, dry food items and sweets are distributed to the helpless poor needy of rural areas on Deepawali.
